SEEDS and BULBS

OF

SOUTH AFRICAN NATIVE PLANTS for 1932

It will always be our endeavour to supply the very best seeds and bulbs, true to the description given in this catalogue, but it is a condition of sale of all seeds and bulbs sent out by us, that, though we give you our assurance that we are using all reasonable care in the selection, we accept no responsibility in regard to the crop or failure of crop. All orders are booked on the understanding that these conditions are agreed to and we also notify to the same effect on the invoice. If the conditions are not acceptable to you the goods should be returned at once.

When we are unable to supply the exact variety ordered, we use our best judgment as to substituting other varieties. Any such substitutions are always made with a due regard to season, locality and other conditions so far as known to us.

The substituted varieties are sent for your approval, and while we hope and feel sure that you will agree to what we have done with a desire to serve your best interests, you are at liberty to send back any such goods and we will promptly credit you with their value.

EXCHANGE.

All prices in this catalogue are quoted in SOUTH AFRICAN CURRENCY.

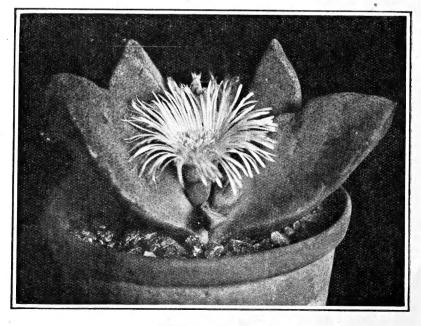

We will accept British Currency if 25 per cent. is added to the total, even though the ruling rate of exchange may be more favourable to us.

We will accept United States Currency on the basis of 4s, 2d, per dollar,

German Currency is acceptable to us on the basis of 1s, per Gold Reichmark.

Dutch Currency can be converted on the basis of 1s. 8d. per Guelder.

SEEDS

OF

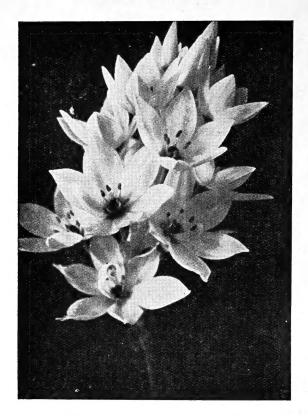

SOUTH AFRICAN NATIVE PLANTS

All prices in this catalogue are quoted in South African Currency. See page 2 for equivalent rates in British, American and other currencies.

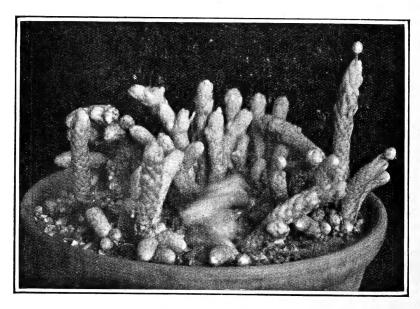

We will prepay postage on all seeds ordered from this catalogue IF CASH IS SENT WITH THE ORDER.

ANNUALS AND HERBACEOUS PERENNIALS.

| | Per | pkt. | $\frac{1}{4}$ - OZ. | oz. |
|---|------------------|-------|---------------------|------|
| Anchusa riparia.—A very fine species of mixed blue | | 6d | 3/- | 10/6 |
| Arctotis acaulis.—Herbaceous perennial; beautiful large daisy-fleers; yellow and red | | 6d | 1/6 | 5/- |
| Arctotis laevis.—Large flowers in a fine range of colours, flower early as an annual, $1\frac{1}{2}$ ft. | ring | 6d | 2/- | 7/6 |
| Arctotis scarpigera.—A very fine strain of mixed colours | | 6d | 2/- | 7/6 |
| Arctotis speciosa.—Perennial; orange, dark reverse | | 6d | 1/6 | 5/- |
| Arctotis, Mixed.—Splendid South African Daisies in many beaut colours | • • • | 6d | 1/6 | 5/- |
| Ceratotheca triloba.—A tall biennial with rosy mauve tubular flers somewhat resembling Foxglove, a very fine summer-flowing plant | wer- | 6d | 1/- | 3/- |
| Dimorphotheca pluvialis.—Large white daisy-flowers on traistems, remarkably fine and a good drought resister; I sunny situation | ling ikes | 6d | 2/3 | 7/6 |
| Felicia Bergianus.—Brilliant annual; blue ray and yellow disc | | 6d | 4/- | 15/- |
| Felicia Capensis.—A very pretty dwarf-growing plant; masses beautiful blue Aster-like flowers | of | 6d | 2/6 | 8/6 |
| Felicia rotundifolia.—Blue Aubrietia-like perennial | | 6d | 4/- | 15/- |
| Gazania pavonia.—Orange; low-growing border or bedding p with large daisy-flowers; very showy | **** | 6d | 3/ | 10/6 |
| Gazania Pottsii.—Yellows and oranges; free and prolonged flowe | ring | 6d | 3/- | 10/6 |
| | | seeds | 100 | 1000 |
| Gerbera hybrida.—Barberton Daisy Hybrids. Beautiful long-stem daisies in a fine range of colour from cream through all shades of red; finest for cut-flowers | the | 6d | 2/6 | 20/- |
| | rlet | 6d | 2/6 | 20/- |
| | | pkt. | $\frac{1}{4}$ - OZ. | OZ. |
| Mesembrianthemum crinificrum.—Brilliant early-flowering annu- gorgeous colours; they flower here in August when flowers scarcest; grand for bedding | are | 6d | 4/- | 15/- |
| Nemesia strumosa.—Our most popular spring annual; affords infinite variety of colour and is a most pleasing flower decoration; an immensely improved strain giving flowers splendid size and rich colours | of | 6d | 5/6 | 20/- |
| Scabiosa columbaria.—A very fine South African species, shof mauve | *** | 6d | 3/6 | 12/- |
| Ursinia anethoides.—The grand new orange and chocolate an so much in demand | ••• | 6d | 4/- | 15/- |
| Ursinia anthemoides.—Brilliant annual in shades of yellow orange | and | 6d | 1/6 | 5/- |
| Venidium fastuosum.—The Namaqualand Daisy. A glorious or and purple-black novelty; 2 ft. | ange | 1/- | 6/9 | 25/- |

THE BEAUTIFUL CAPE "CHINKERICHEE."

ANACAMPSEROS PAPYRACEA.

BULBOUS PLANTS.

| Per | pkt. | $\frac{1}{4}$ - OZ. | OZ. |
|--|-----------|---------------------|-------|
| Agapanthus.—Blue African Lily. Magnificent umbels of blue flow- | - | | |
| ers veined lighter blue, borne on a tall scape; a very strik- | | | |
| ing plant | 6d | 3/- | 10/6 |
| Aristea capitata.—A magnificent bulbous plant with deep blue flowers | 6.1 | 7/ | 10/6 |
| on a spike four to five feet high | 6d | 3/- | 10/6 |
| Babiana disticha.—Pale lilac | 6d | 2/3 | |
| Babiana stricta.—Various colours | 6d | 2/- | |
| Babiana sp.—Blue | 6d 6d | 2/- | |
| Babiana sp.—White, very choice | oa | 3/- | |
| Babiana, Mixed.—Early-flowering crocus-like flowers, in many colours; easily grown from seed | 6d | 1/6 | 5/- |
| Bulbine caulescens.—Straggling habit; elongated fleshy leaves with long spike of starlike flowers | 6d | 3/- | 10/- |
| Dierama pulcherrima var. atropurpurea.—Beautiful bulbous plant | 1/- | 6/- | 21/- |
| with funnel-shaped flowers on a tall stem Freesia refracta alba.—These beautiful bulbous plants are easily | 1/- | . 0/- | 211 |
| raised from seed; many of the seedlings will flower the first season | 6d | 1/- | 3/- |
| Gladiolus callistis.—A scented species; white to pink and purple | | | , |
| marked | 6d | 5/6 | 20/- |
| Gladiolus tristis Cream or greenish white with brown bar or band | 6d , | 5/6 | 20/- |
| Homeria sp.—Yellow | 6d | 2/3 | 7/6 |
| Ixia leucantha.—White and mauve, separately or mixed | 6d | 3/- | 10/6 |
| Ixia maculata.—Orange and red | 6d | 3/6 | 12/6 |
| Ixia polystacha.— | 6d | 4/- | 15/- |
| Ixia scariosa.—Mauvy white flowers with yellow throat; very dainty | 6d | 2/3 | 7/6 |
| Lachenalia liliiflora.—Dense spike of white flowers with greenish | 1/ | 61 | 01/ |
| white bars, rare | 1/- 6d | 6/- | 21/- |
| Lachenalia orchioides.—Light yellow and greenish | 6d | 4/- | 15/- |
| Lachenalia purpureo-coerulea.—A fine species | 6d | 3/- | 10/6 |
| Edulionalia Pasteriatai 77 miles of chicosa | 1/- | | |
| Lachenalia unicolor.—Bright red Lachenalia unifolia.—"Tulbagh Opals"; very choice | 1/- | | |
| Moraea bicolor.—Fibrous-rooted evergreen, yellow and maroon, 4 ft. | 6d | 4/- | 15/- |
| Mcraea iridioides.—Fibrous-rooted evergreen, white and blue, 3 ft. | 6d | 4/- | 15/- |
| Moraea polystacha.—Lilac | 1/- | 6/- | |
| Ornithogalum lacteum.—The "Darling Chinkerichee"; late flowering | 6d | 3/- | 10/6 |
| Ornithogalum thyrsoides.—The beautiful "Cape Chinkerichee"; | | | |
| early-flowering | 6d | 2/3 | . 7/6 |
| Sparaxis bulbifera.—Buttercup yellow, very fine | 6d | 3/- | 10/6 |
| Sparaxis grandiflora.—White. Resembles Freesia but taller | 4d | . 6d | . 9d |
| Sparaxis tricolor.—Mixed. Beautiful Freesia-like flowers in bright | 6.3 | 3/ | 10/6 |
| colours; yellow, red and green | 6d .6d | 3/- | .10/6 |
| Sparaxis tubificra.—Light yellow | .ou | | |
| V I | 6d | 3/- | 10/6 |
| Streptanthera cuprea.—A beautiful Freesia-like flower of splendid form and lovely soft shade of tangerine | 6d | 2/3 | 7/6 |
| Streptanthera-Sparaxis Hybrids.— | 6d | 3/- | 10/6 |
| Watscnia Beatricis.—Long spikes with numerous orange flowers, opening mostly at one time; evergreen foliage; must be watered | | | 20/0 |
| in the dry season as it is a summer grower Watsonia longifolia, Mixed.—Evergreen foliage, must be watered in | 1/. | 6/- | 20/- |
| the dry season Watsonia Wilmaniae.—A grand species with distinct and varied | 1/- | 6/- | _ |
| colours Watsonia Wordsworthiae.—Lilac flowers; resembles "W. Ardernei" | | 6/ | _ |
| in type Watsonia sp.—"Van Staaveren." Cerise, large-flowered; grand | 6d 6d | 1/9 | · · |
| | | | |

SHRUBS AND TREES.

| Per | pkt. | 4-0Z. | OZ. |
|---|----------|-------|------|
| Aitonia Capensis.—"Klapperbos." A beautiful shrub from the Oudtshoorn district; the showy pink capsules resemble small Chinese lanterns | | | _ |
| Aulax cneorifolia.—Yellow-flowering, evergreen shrub; allied to the Proteas | 6d | 3/- | |
| Barosma crenulata.—Oval-leaved Buchu. A handsome flowering shrub, pale mauve, grows to about 4 ft. | 6d | 4/- | _ |
| Calcdendron Capense.—Beautiful large flowers in terminal panicles; pinkish white with purple; very conspicuous | 6d | _ | 1/3 |
| Euryops spathaceus.—Yellow-flowered evergreen shrub | 6d | 3/- | 10/6 |
| Heterolepsis decipiens.—Evergreen dwarf shrub; large yellow flowers | 6d | 5/- | 16/- |
| Lebeckia cytisoides. —Leguminous shrub resembling Cytisus; clusters of yellow pea-flowers are produced in great profusion in early | 6d | 9d | 2/6 |
| Leucadendron argenteum.—The Silver Tree. Indigenous on the slopes of Table Mountain and well known for its beautiful | | , | 1/3 |
| silvery foliage | 66 | | 1/0 |
| Leucadendron plumosum. —Dark-grey-leaved evergreen shrub, up to 10 ft.; very decorative | 6d | _ | _ |
| Mesembrianthemum aureum.—Dwarf-upright in habit; large brilliant orange flowers; very fine. Per 3 capsules 1/ | _ | · | |
| Mesembrianthemum Levynsiae.—Dwarf bush of compact growth, mauve flowers in profusion. Per 4 capsules 1/ | _ | _ | _ |
| Noltia Africana.—A dense dark-leaved shrub or small tree; ever- green | 6d | 2/- | _ |
| Ochna atropurpurea.—A fine evergreen shrub, with yellow flowers followed by crimson and purple fruits | 6d | 3/- | 10/6 |
| Podalyria calyptrata.—Very beautiful flowering shrub, rapid grower, mauvy pink pea-flowers in long sprays | 6d | 1/6 | 5/- |
| Podalyria calyptrata, White.—This seed has been saved from the white form of this beautiful shrub but can not be guaranteed to come true to colour | 6d | 3/6 | 12/6 |
| Polygala virgata.—Tall wiry Broom-like shrub with beautiful reddish purple pea-flowers | 6d | 3/- | 10/6 |
| Protea compacta.—Tall spreading plant; rose colour; free flowering | 6d · | 9d | 2/6 |
| Protea latifolia.—Red and cream, upright, 12 to 15 ft., almost perpetual flowering | 6d | 9d - | 2/6 |
| Protea marginata.—Variable habit; flowers pink with blackish-brown tips | 6d | 9d | 2/6 |
| Protea mellifera.—Commonly known as The Sugar Bush. A beautiful shrub of the South Western districts of the Cape Province; it | 6d | 9d | 2/6 |
| yields a great quantity of delicious nectar Protea Mundii. —Very tall and erect, up to 20 ft., flowers white | 6d | 9d | 2/6 |
| Protea meriifolia.—Very tan and erect, up to 20 it., nowers winte Protea neriifolia.—Variable; rose and brown heads | 6d | 9d | 2/6 |
| | | 9d | 2/6 |
| Protea obtusifolia.—Red, 6 ft., bushy growth; flowers in early spring Protea pulchella.—Greenish pink, 4 to 5 ft., bushy habit, flowers in our Winter months | 6d | 9d | 2/6 |
| Protea Susannae.—Rich red, 10 to 12 ft., loose upright growth; | oa | Oct | 2,0 |
| flowers in our early Winter months Rhus lancea.—Karree. A hardy tree of the Karroo and other parts of South Africa; makes a splendid hedge plant as well as | 6d | 9d | 2/6 |
| a shapely tree Senecio grandiflora.—A compact bushy shrub; mauve flowers | 6d 6d | 9d | 2/6 |
| Sesbania cinerascens.—A quick-growing graceful small tree | 6d | 3/- | |
| Sutherlandia frutescens.—Cancer Bush. A leguminous shrub having very pretty scarlet flowers followed by ornamental pods | 6d | | 1/- |
| Virgilia Capensis.—Evergreen leguminous tree with sweetly scented | | | -/ |
| lilac flowers in spring and early summer | 6d | _ | 2/- |

SUCCULENTS

Most of the species listed under this heading belong to that great and interesting group of South African plants, Mesembryanthema, which has in recent years,

attracted a great deal of attention throughout the world.

In the arid regions of the Karroo, Bushmanland and the Kalahari an amazing number of new species has been discovered to which various expeditions, led by the best veldsmen available and equipped at great expense, have added considerably.

It is in the desert that the most fascinating varieties are found. To combat the scanty rainfall nature has endowed these plants with a capacity for storing water in their thick fleshy leaves, thus enabling them to tide over periods of drought which no other plant would survive. They furnish the only available water supply to the herds of antelope, wild ostriches and even to the tortoise and were it not for a remarkable provision of nature these plants would long since have been exterminated. In their natural surroundings these "rock plants" so closely resemble the gravel or rock fragments among which they grow that, even to the best trained eye, they are almost invisible, and it is due to this fact that they have, in the populated areas, escaped complete extinction.

All the varieties listed below are easily propagated from seed and given free drainage and a light soil will thrive well under cultivation. They include the most recent discoveries, some of which have not yet been specifically named and are un-

obtainable from any other seedsmen in the world.

Seeds "in the capsule" are refused entry to the United States of America but will break up the capsules, and clean the seed, before despatch for American orders.

We pay postage on these seeds if you send Cash With Order. See page 2

for exchange rates.

SUCCULENTS AND SIMILAR RARE PLANTS.

Aloe microstygma.—A tall-growing Aloe with broad light green toothed leaves; large spikes of orange-yellow flowers, darker at the base. Pkt. 6d; 4oz. 3/-; oz. 10/-. Alce saponaria.—A very attractive species with tall branching spikes of bright red flowers. Seeds per doz. 1/-; 100 7/6.

Aloe striata. Compact stemless habit, leaves greyish-green, large, smooth and spine-

less; large heads of orange-red flowers on erect stem; height in flower 3 feet; most conspicuous. Seeds per doz. 6d; 100 2/6.

Aloe variegata.—Th's species has great drought-resisting capacity; the red flowers and variegated foliage are very striking. Seeds per doz. 9d; 100 2/6; 1000 22/6.

Anacampseros arachrioides.—A graceful little plant with light mauvy pink flowers;

soon makes a large clump. Seeds per doz. 6d; 100 3/6.

Anacampseros papyracea.—A rare plant of most peculiar formation, the growths being entirely covered with white papery scales; when growing amongst white stones can hardly be detected. Per doz. seeds 1/-; 100 7/6.

Apicra foliosa.—Curious hard-leaved plant with tall flowering stem; allied to the Aloes, closely resembling the Haworthias. Per doz. seeds 1/-; 100 5/-.

Argeta petrensis. - A curious cluster of angular leaves resembling broken shale. Per 6 capsules 1/-.

Argyroderma testiculare.—Dwarf stemless Mesem.; very rare. Per 2 capsules 1/6. Aridaria resurgens.—This curious little plant remains hidden underground for the greater portion of the year but in the springtime produces a delightful cluster of yellow blooms which in turn develop into blood red capsules. Per capsule 1/6. Bergeranthus vespertinus.—Triangular leaves; very dwarf growth; flowers yellow

with orange reverse. Per 2 capsules 1/6.

Caralluma ramosa.—Closely allied to the Stapelias which it resembles in growth;

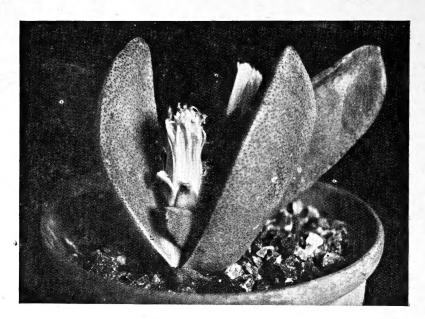

flowers in clusters. Seeds per doz. 6d; 100 2/6; 1000 20/-. Carruanthus caninus.—Formerly Faucaria canana; a dwarf Mesem., the growths are grey-green and toothed on the upper surface; flowers yellow; makes a nice compact specimen. Per capsule 1/-. Cheirodopsis cigarettifera.—A dense Mesem-like plant the base of which resembles

a cigarette-holder; large yellow flowers. Per 3 capsules 1/-.

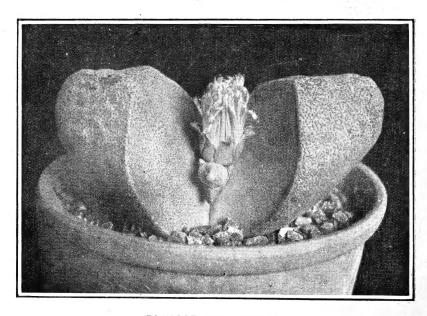

Cheirodopsis tubercularia.—Like "C. cigarettifera"; the growths are covered with minute tubercles. Per 2 capsules 1/-.

Conophytum pauxillum.-Fragrant night-flowering species; flowers orange with reddish reverse; growths green with reddish dots and lines. Per 3 capsules 1/-. Conophytum sp.—Closely clustered buttonlike nodules each comprising two tightly

welded leaves which open only to allow the flower to emerge. Per 4 capsules 1/-. Cotyledon decussata.—The most beautiful bell-shaped red flowers on long slender stems; ornamental foliage. Pkt. 1/-; 4oz. 15/-.

PLEIOSPILOS MAGNIPUNCTATA.

PLEIOSPILOS BOLUSI.

Page eight.

Crassula Archerii.—A dwarf Crassula of branching habit, stems golden tinted and producing a dozen perfumed heads of creamy white. Per 2 clusters 1/-.

Crassula cotyledon.—Large showy bush, fleshy silver covered leaves with red tinted edges, bearing large clusters of white flowers. Pkt. 1/-; 4oz. 15/-.
Crassula pachyphylla.—A single stemmed dwarf similar to "C. columnaris" producing

beautiful and highly scented flowers. Per cluster 9d.

Crassula pyramidalis.—A very attractive dwarf variety not unlike "C. Acherii."

Per 3 clusters 1/-.

Crassula rupestris.—Forms a large bush with very showy autumn tinted foliage. Pkt. 1/-; $\frac{1}{4}$ oz. 6/-; oz. 22/6. Cylindrophyllum Bainii.—Per 3 capsules 1/-.

Cylindrophyllum Comptonii.—Large fingerlike clusters; large yellow flowers in great Per capsule 9d. profusion.

Delosperma herbum,—Per 25 seeds 1/-; 100 3/-.

Didymaotis lapidiformis.—One of the rarest of the "stone plants." Consists of two brown stemless stonelike leaves resembling the broken shale among which they Per 2 capsules 1/6.

Didymaotis (New sp. 035).—A newly discovered, unnamed, dwarf variety.

capsules 1/-.

Euphorbia aggregata.—Seeds per doz. 1/6; 100 10/6.

Euphorbia clandestinum.—A very interesting species with obese, warted stem, bearing a rosette of dark green leaves from the centre of which arise numerous flowers on thin, graceful stems. Seeds per doz. 1/3; 100 8/6.

Euphorbia esculenta.—A dwarf succulent having a large swollen underground stem;

flowers sweetly scented. This is a highly nutritious and drought resistant fodder Seeds per doz. 1/3; 100 8/6.

Euphorbia mauntanuca.—Seeds per doz. 6d.

Euphorbia multiceps.—Seeds per doz. 2/6.

Euphorbia obesa.—A very rare plant, resembling in shape a miniature football.

Seeds per doz. 4/-; 100 25/-.

Euphorbia Pillansii.—Seeds per doz. 1/6; 100 10/6.

Euphorbia tuberculata.—A curious succulent, perennial, growing to 30 inches in height; its branches which are thickened towards the tips are covered with rhomboid tubercles and have the habit of radiating so as to point practically due north. Per doz. seeds 2/6.

Gasteria verrusco .- One of the largest and best of the Gasterias; tall branching flower stem, 3 to 4 ft.; flowers coral, tipped green. Seeds per doz. 1/-; 100 7/6. Gasteria sp 042.—Seeds per doz. 6d; 100 2/6; 1000 22/6.

Gibbaeum angulipses.—Angular autumn tinted leaves; flowers profusely. capsules 1/-.

Gibbaeum Boscheana.-Per capsule 1/-.

Gibbaeum dispar.—Dwarf type; dull slate colour, harmonising perfectly with the formation in which it grows. Per 2 capsules 1/-.

Gibbaeum geminum.—A dwarf variety somewhat resembling "G. pubescens." 4 capsules 1/-.

Gibbaeum molle.—A cluster of fleshy nodules which resemble the round stones among which they grow. Per 3 capsules 1/-,
Gibbaeum perveridae.—A cluster of quaintly shaped leaves of typical Gibbaeum

structure. Per 2 capsules 1/-.

Gibbaeum pubescens.—One of the best of the genus; silvery fingerlike leaves which grow together in the shape of a molehill; flowers profusely. Per 2 capsules 1/-. Gibbaeum Shandii.-Very similar in habit and growth to "G. pubescens." capsules 1/-

Glottiphyllum depressum.—A handsome, easily grown species; growths short and broad; large golden yellow flowers, freely produced. Per 2 capsules 1/-.

Glottiphyllum sp. 042.—All species of this genus make excellent specimens, whether

in pots or in a rockery. Per 8 capsules 1/-.

Haworthia Bolusi.—Dwarf compact habit, prefers a shady situation; tips of growths incurved and covered with delicate spines, giving the plant a spiderweb appearance. Per pkt. 1/-.

Hereroa cana. Squat angular earth-coloured leaves which harmonise with their

natural surroundings. Per 6 capsules 1/-.

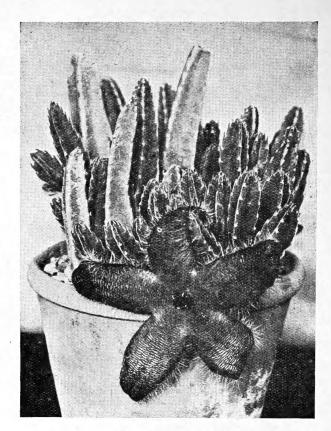

Hereroa dolabriformis.—A dwarf compact plant, leaves round at the base but becoming more and more compressed laterally towards the apex, giving the growths a hatchet-shaped appearance. Per 4 capsules 1/-.

Hereroa granulata.—A dwarf Mesem. bearing bright orange flowers. Per 2 cap-

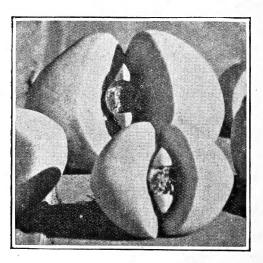

sules 1/-.

Hereroa Stanleyi.—This species produces an abundance of yellow flowers. Per 4 capsules 1/-.

Hereroa (New sp. 043).—Somewhat larger than "H. dolabriformis"; flowers profusely. Per 4 capsules 1/-.

STAPELIA GRANDIS.

ARGYRODERMA
TESTICULARE.

Page ten.

Hymenocyclus croceus.—Large fingerlike fleshy leaves with bright yellow flowers.

Per 4 capsules 1/-.

Lithops Comptonii.—The natives have named these plants "The Devil's Eyes." They grow in pairs and only the upper transparent portion of the leaves appears. above ground, Per capsule 9d.

Lithops Kewbisensis.—The various species of Lithops are highly interesting plants from the desert regions of South West Africa. Their short stumpy growths are level with the surface of the soil, and transparent to allow the sunlight to reach their inner surfaces. Per capsule 1/-.

Mentocalyx velutinum.—The clusters of golden yellow leaves and large flower of the

same colour present a very showy appearance. Per 2 capsules 1/-.

Mesembrianthemum meleagris.—Small compact bushy growths 2 inches high; russet leaves and mauve flowers. Per 8 capsules 1/-.

Mesembrianthemum obtusum.—Stunted cluster of twin fleshy leaves; flowers pro-

fusely. Per 2 capsules 1/-.

Mesembrianthemum Peersii.—Per 8 capsules 1/-.

Mesembrianthemum ringentea.—A stemless Mesem.; flowers yellow with reddish brown reverse; toothed growths with a bronzy appearance. Per capsule 1/-.

Peersii macradenia.—Fingerlike growths and very showy when in bloom. Per 3

capsules 1/-.

Pleiospilos Bolusi.—The most sought after of the stemless Mesems., growths in pairs, of stonelike appearance, large flowers of a rich golden yellow. sule 2/6.

Pleiospilos Fergusonii.—Rough brown angular fleshy leaves which successfully disguise their presence among the shale of similar structure. Per 2 capsules 1/-.

Pleiospilos magnipunctata.—A handsome stemless Mesem., large bright yellow flow-

ers, one of the best of this type. Per capsule 1/6.

Pleiospilos Nelii.—This plant is composed of two fleshy leaves which, joined together, resemble a water worn stone; exceedingly rare. Per 2 capsules 1/6.

Pleiospilos nobile.—In appearance this species much resembles "P. magnipunctata" except that the growths are longer and narrower and the flowers somewhat larger and richer in colour. Per 2 capsules 1/6.

Pleiospilos Roodiae.—Somewhat distinct from the usual type of this genus; growths

green shading to red during drought; symmetrical, producing a compact clump; flowers yellow. Per 2 capsules 1/6.

Pleiospilos simulans.—A very rare species which should be in every collection.

Differs in shape from "P. Bolusi." Per capsule 2/6.

Rhinephyllum Comptonii.—Per 2 capsules 1/-.

Rhinephyllum Muirii .- A cluster of quaint autumn-tinted fleshy leaves, flowers profusely. Per 4 capsules 1/-.

Rimaria Heathii .- A beautiful stemless Mesem, of shapely form; growths a glossy pale green; makes a fine specimen. Per 4 capsules 1/-. Rimaria (New sp. 035).—Per 2 capsules 1/-. Rimaria (New sp. 044).—Per 4 capsules 1/-.

Ruschia crassa.—A quaint growth of notched stems which, in the spring, produce masses of honey-scented flowers. Per 6 capsules 1/-.

Ruschia impressa.—Compact bush habit with curiously shaped leaves and producing a mass of small mauve flowers. Per 8 capsules 1/-.

Ruschia microphylla.—Cushion shaped clusters with minute pointed leaves. M a brave show of colour in the springtime. Per 10 capsules 1/-.

Ruschia perfoliata.—Dwarf variety resembling "R. crassa." Per 8 capsules 1/-.

Ruschia pygmaeum.—Dense clusters of small nodules resembling Conophytum, flowers profusely. Per 4 capsules 1/-.

Ruschia (New sp. 044).—Compact bushy habit, flowers very profusely. Per 3 capsules 1/-.

Ruschia (unnamed sp. 044/1).—Per 6 capsules 1/-.
Ruschia (unnamed sp. 044/2).—Per 6 capsules 1/-.
Ruschia (unnamed sp. 044/3).—Per 6 capsules 1/-.

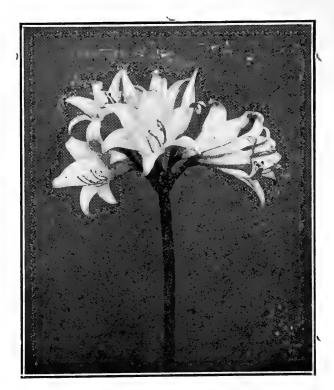

Stapelia duvalia.—Seeds per dozen 9d.; 100 4/-.

Stapelia grandis.—A robust growing species; makes a very conspicuous plant; flowers large and of a pinkish shade, covered with hairy growths. Per 25 seeds 6d.; 100 seeds 1/3; 1000 10/-.

Stapelia hirsutus.—A tall species with purplish black flowers covered with hairy protusions. Per doz. seeds 1/6; per 100 10/-.

Stapelia variegata.—The foliage of this species is particularly handsome, very suitable for miniature rockeries. Per doz. seeds 1/-.

Stomatium Fulleri.—Dwarf pale green growths, peculiarly warted and toothed; flowers freely in spring and early summer. Per 2 capsules 1/-.

AMARYLLIS BELLADONNA.

A VERY FINE STAPELIA.

Page twelve.

CAPE BULBS

It is well known that the flora of the Cape of Good Hope is remarkably rich. in bulbous flowering plants of great beauty and of easy culture. From these some of the finest garden bulbs of the present day have been derived. Many gems remain to be developed and are to be found in the fine collection of native species listed below.

Permits are required for the introduction of bulbs into the United States of America and these should accompany the orders. This may also apply to some other countries and we suggest that enquiries be made about this.

Delivery of Bulbs can only be given in the dormant season which is from De-

cember to March. Send your order now and avoid disappointment.

Postage will be paid by us on all bulbs if cash is sent with the order and provided the value is 10/- or more. On smaller orders 1/- additional must be sent

Exchange is dealt with on page 2 of this catalogue.

G. alatus .- The "Kalkoentjie." Terra-cotta with green and yellow on the lower segments, flowers fairly large for a native species,

G. hastatus.—A very charming pink species
 G. hirsutus.—Large deep pink blooms, sometimes striped with white, variable, sweetly scented

G. tristis.—A large-flowered, tall-growing species, ten to twelve flowers on a delicate stem, often 4 ft. tall; pale yellow mottled with brown; sweetly scented in the evening

G. Watsonius.—A tall red species; flowers resemble the Watsonia

maculatus.—The most sweetly scented of all Gladiolus; flowers brown mottled with yellow; 18 inches to 2 feet

villosus.—An early-flowering species of a delicate mauvy pink

vittatus .- A delicate rosy mauve, faintly scented, height about

sweetly scented, 6 to 12 inches

to 2 feet

15 to 18 inches

shade; height 15 to 18 inches

20 / -3/-G. aletroides (Flames).-A beautiful winter-flowering species, colour orange-red, variable; does well in cultivation; splendid cut-flower, lasting well in water; 18 inches to 2 feet ...

G. blandus (Type).—There are several variations of this species 2/6 6d 18/6ranging from almost white to deep pink, all varieties have deeper markings on the lower segments. These are commonly known as "Painted Ladies." The "type," as well as all the varieties, is a charming plant for rock gardens; height 18 in. Var. "Carminea." Height 18 to 30 inches, flowers large 2/6 18/6 and of a pale flesh colour, specially good for cut-flower ... "Cream Painted Lady." We are not sure that this is a 18/6 "Cream Painted Lady." We are not sure that this is a variety of "G. blandus"; it is not yet identified, resembles "G. cuspidatus" but taller, colour beautiful rich cream, height up to 2 feet 25 / -6d 4/-'Table Mountain Painted Lady.' A tall and beautiful variety, deep rosy pink, large flower ... "The Vlei Painted Lady." Grows in marshy situations, col-1/310/our pale pink with deeper markings on the lower segments, height 18 inches 25 / -6d 4/-G. callistis .- Pale pink with deeper throat markings, flowers large and well placed on the stem, very dainty 1/310 / -G. carmineus.—This species is peculiar in that the flowers are produced first and the long leaves afterwards; flowers fairly large for a native species, intense carmine; height 15 inches ... debilis.—White shaded pink, marked with deep carmine; a charming spring-flowering species with tall reedlike stem 1 to 9d5/-37/6 6d2/6 18/6 1½ feet G. gracilis .- A winter-flowering species; colour blue marked with yellow on the lower segment; one of the prettiest species; 1
